Five seasoned politicians, each a leader in close touch with his district, yesterday swapped observations and experiences. They spake out the low down on condition that no names be revealed, to avoid entanglement in political feuds. All five have close contacts with the city hall.

"Here's one vital trouble," said one. "Under the present rule police lieutenants are kept in the station. The theory was that the citizen going to the station with a complaint ought to be able to deal with some one in authority instead of with a mere deak sergeant.

FACTS ABOUT TEA SERIES-No. 1

# Tea as a Beverage

Tea first became known in China nearly 3000 years before Christ. In that country tea was greatly prized, both for its remarkable qualities as a beverage and for the : Imost religious ceremony attached to the drinking of it. Up to the sixth century, tea was used only for medicinal purposes. Even in the seventeenth century it cost \$25.00 to \$50.00 per pound. All tea caddles were constantly kept under lock and key. Today when even fine quality like "SALADA" costs less than one-third of a cent per cup, it is not surprising that the consumption of tea is increasing tremen-

## CONFISCATION AS TAXATION.

Oliver's reply to the proposal of chool board to fix a full cash value on estates emphasizes again the evil of our Illinois system of taxation. As he points out, to adopt the board's suggestion would be to confiscate a good part of these estates by imposing a rate which would wipe out the whole income in many cases and in some cases create a charge even greater than the in

If the school board favors confisc the guise of taxation, we think it is acting without the support of the better part of the community If it believes estates should not be passed on but should be taken over by the public, it has got farther toward revolutionary radicalism than we suspected. The bolshevists have been trying confiscation with results which are pretty well known. Confiscation may seem acceptable to a man who has nothing to confiscate, but it is not profitable even to him, as the Russians are discovering.

# LIVING BUDDHA' VISITS CHINA

SHANGHAI, April 30.—Panchon Lama, the "Ldving Buddha" of Tibet, attired in yellow silks and traveling on a special train decorated with yellow banners, arrived in Shanghai this afternoon. After a brief reception at the railroad station he entered a freshly painted yellow American motor car for a trip to the bureau of foreign affairs, where he will reside for a few days prior to making a trip to Hangchow to be the guest of Tuchun Sun Chaun Fang, during visits to the famous Buddhist temples there.

temples there.

The living buddha was conspicuous in modern born rimmed spectacles. More than 10,000 Chines packed the streets about the railroad station making it necessary for military police to clear the street so he and his entourage could pass. The odor of the lysol soon disappears, but if you prefer the bath and treat-ment can be taken at night, by morning

there can be no trace of the odor. The Chinese commercial and other organizations on the reception committee gave the visitor a royal welcome, while the cheering multitudes deeply stirred by his visit.

Rumors are in circulation of miraculous cures being effected by the buddha through laying his hands on a person, and the ignorant coolies b they can obtain a 100 year life extension if they are touched by the religious leader.

Tonight a vegetarian dinner is being given in honor of the visitor, which all the local officials

are attending.

The only discordant note in the visit was a refusal by a local Chinese millionaire to permit the living buddha to reside in his villa at Hangchow on the grounds that the millionaire's children were Christians and he would suffer a loss of face if he T. Must Borrow Money for Improvements

Some persons may have a mistaken idea about the financial condition of the railroads because of the large sums of money spent recently for improved railway facilities. In the last five years the railroads have installed 9,979 new locomotives, 8,988 new passenger cars and 584,982 new freight cars and have made other improvements to their properties at great expense. Anyone not familiar with how these improvements are financed might take them as indicating that the railroads are immensely prosperous.

Such, however, is not the case. What the railroads have left out of their revenues after meeting their current obligations is far from sufficient to pay for all the improvements they need to make. In 1924 the railroads of the country spent more than one billion dollars for property improvements. The Illinois Central System alone spent approximately \$29,000,000 for these purposes. In both cases the expenditures for improvements required the investment of considerable new capital. The railroads had to raise large sums of money from investors in order to finance this expansion.

As a result of economies of operation made possible partly by their investment in improved properties, the railroads as a whole have effected in recent years a substantial improvement in net earnings. In 1921 the rate earned on the tentative valuation placed

improvement in net earnings. In 1921 the rate earned on the tentative valuation placed upon their properties by the Interstate Commerce Commission for rate-making purposes was 3.33 per cent; in 1922 it was 4.14 per cent; in 1923 it was 5.22 per cent; in 1924 it was 5.00 per cent. But it should be borne in mind that the rate of return has not at any time reached the 5.75 per cent which the Interstate Commerce Commission has decided is the fair and reasonable rate that the railroads ought to be permitted to earn.

The present outlook, all things considered, is decidedly favorable to continued good railway service. The facilities of the railroads are sufficient for present needs and are being expanded to meet the increased needs of the future. By means of their increased facilities the railroads are realizing greater economies and providing better service than ever before. The public by reason of its closer acquaintance with the railroads and improved understanding of railway problems, looks with favor upon allowing the railroads the earnings necessary to attract the new investment they need. This is as it should be. The country requires adequate transportation for its continued growth and prosperity, and adequate transportation cannot be provided except as the railroads are enabled to grow and presper.

Service is the standard by which railroads can and should be judged. The Illinois Central System is constantly endeavoring to uphold and improve its service to the public.

Constructive criticism and auggestions are invited.

# In Price of Chicago Solvay Coke

A sensational drop in the price of Chicago Solvay Coke makes it today the greatest fuel bargain in years; a cut of 20% is sensational. It is at the bottom price. Take advantage of it. Fill your bins now. Storage in your basement costs you nothing. Storage by manufacturer or dealer is expensive because of rehandling costs and the use of valuable space. Get your order in today, before the June first advance.

Slash your next winter's fuel bill now by buying Chicago Solvay Coke at today's price. It is more than 30% under the cost of hard coal and is higher in heat-producing elements. There is no smoke, no soot and few ashes. Don't pay someone else for fuel storage while your bins stand empty. Fill them now with Chicago Solvay Coke at the bottom price.

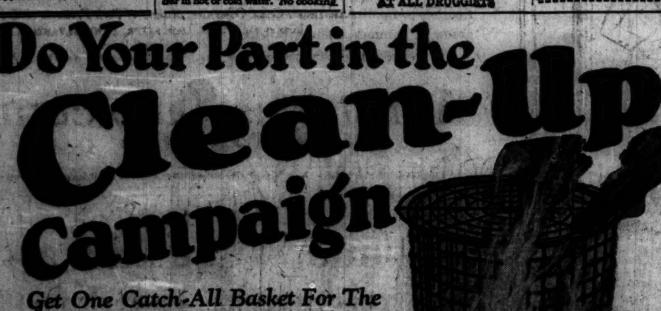

You can get Quick Service from our corps of Fuel Experts. We will help you take advantage of this wonderful fuel bargain. Just telephone your dealer that you want a Chicago Solvay Coke man to look over your heating plant-boiler, hot air furnace or stove-and show how easily you can heat your home with this cleaner, smokeless, better fuel now selling at a sensationally low price. # Tribune Want Ads are consistently resultful

Consistent resultfulness is an important asset possessed by Tribune Want Ads. It is important to the Want Advertiser, because it offers assurance that there will be an ample response to an offer at any time.

This consistency is the result of a public habit that has developed during the years that Tribune Want Ads have served the needs of Tribune readers. The knowledge of the broad scope of opportunities for buying that are daily presented to them in Want Ad form impels readers to turn to Tribune Want Ads as soon as a need develops. Owners can benefit by this constant attention by consistent Want Advertising.

Mr. Alphonse Von Emelen, 3225 N. Hoyne Ave, used this Tribune Want Ad on three alternate days. He reported that the store advertised was sold on the evening of the second day his Tribune Want Ad appeared and that he received twelve replies during this time.

Due May 1, 1930 Interest payable May r and November r in New York, without deduction for any normal Federal Income Tax not in excess of 2% per annum. Provision for refund of Pennsylvania and Connecticut personal property taxes not exceeding four mills, Maryland securities tax not exceeding four and one-half mills, and Massachusetts income tax not exceeding 6% per annum. Coupon Notes in denominations of \$1,000, \$100, and \$100, registerable as to principal. Redeemable in whole or in part, on 30 days notice, on or before April 30, 1926, at 104 and accrued interest; thereafter on or before April 30, 1927, at 103; thereafter on or before April 30, 1928, at 103; and thereafter to maturity at 101, together with accrued interest in each case. Convertible under the terms of the Indenture into Common Stock on the basis of one share of Common Stock for each \$100 par amount of Notes.

Guaranteed unconditionally as to principal, interest and Sinking Fund, jointly and severally by Kentucky Distilleries and Warehouse Co., Liberty Yeast Corporation, and Kentucky Alcohol Corporation.

THE EQUITABLE TRUST COMPANY OF NEW YORK, Trustee

Mr. Seton Porter, President of the Corporation, has summarized as follows his letter, copies of which may be obtained from the undersigned.

General: Incorporated in Virginia, the Corporation succeeded in 1924 to the business formerly conducted by U. S. Food Products Corporation. It controls, through stock ownership, subsidiary operating companies engaged respectively in the manufacture and sale of industrial alcohol, yeast and their by-products, and also in the sale of molasses and other products.

The fixed properties of the Corporation and its subsidiaries are valued, after deducting for depreciation, at \$6,200,000, which is based upon an appraisal by Messrs. Sanderson and Porter of the fixed properties in the United States, and a valuation of the Cuban properties made by the Company's engineers prior to the acquisition of such properties. As of March 31, 1925, net current assets alone were in excess of \$3,800,000, or substantially more than the face amount of these Notes.

Security: These Notes are a direct obligation of the Corporation, and represent the only funded debt of the Corporation except underlying mortgages aggregating \$60,750. They are followed by Preferred and Common Stocks which have a present market value (April 30, 1925) in excess of \$12,700,000; based on New York Stock Exchange prices.

Earnings: Consolidated earnings of the properties applicable to interest charges of \$200,354 on the Notes of this issue now outstanding, for the two years ended December 31, 1924, before depreciation and Federal taxes, have

For the 3 months ending March 31, 1925, such earnings were \$519,082.11, or at the rate of 10.38 times such interest charges. The Corporation has made charges to depreciation out of the above earnings of \$290,426.16 in 1924, and \$267,107.12 in 1923, an average of \$278,766.64 for the two years.

Sinking Fund: The Indenture provides for a Sinking Fund of \$320,000 per annum, payable semi-annually for the purchase or redemption of these Notes. It is estimated that approximately half of the issue will be retired prior to maturity through the action of the Sinking Fund.

We offer these Notes, if, as and when received by us, and subject to the approval of our counsel.

# To all business houses that are

If you are moving into better space, are you repared to make better use of it? The physical task of moving your stocks of goods-raw material — tools — equipment — office supplies — makes this suggestion pertinent;

Let us offer recommendations on the storage and care of all your material in the new quarters. We are specialists in caring for things—the scientific storage of everything used in business.

The rearrangement of a stockroom may save the time of everybody in your office or plant; more modern equipment in the supply room can speed-up every department; tremendous econo-mies can be effected for a very small sum. There will never be a better time to organize your supply department. Nor a more logical time to standardize on filing cases; make convenient locker installation, etc. The whole matter can be accomplished in a few hours. Our men who have made it a study are solving storage problems every day. Those we have served will tell you of specific savings that run into thousands.

Don't put up a shelf-build a bin-or drive a nail in your new quarters until you have read a little book called Caring for Things. We will send you a copy this morning—we believe you'll be glad you asked for it!

Adjustable Shelving, Bins and Racks

Principal and interest on our First Mortgage Bonds will be due and payable during May, as follows:

Investors seeking securities of unquestionable safety will be impressed by the fact that our bonds never lost a dollar and without a single exception have paid both principal and interest on the dates when due. Ask for our latest offerings.

on invested funds is, of course, what every investor would like to get. But those of long experience know But those of long experience know that far more important than keeping to any level of yield is keeping one's list of holdings in proper balance and insisting upon an ample degree of safety in all of them. Five years ago, because of high interest rates, one could buy safe bonds of high market ability at prices to yield large returns. That is virtually impossible today. Conditions have changed. By using great care, however, the investor can find bonds to meet his requirements without a reduction in income correwithout a reduction in income corresponding quite to the change in general rates. Real Estate Exchange **NEW ORLEANS** Will Be Sold

By Public Auction Without Limit or Reserve

In Blocks Or As a Whole 344.67 Acres of Lake Shore Land Within the City Limits of New Orleans

This land is within the city limits—41/4 miles from the commercial center of New Orleans at Royal and Canal Streets. It is bordering at the Lake Pontchartrain end of the Dock Board's property, in which the \$20,000,000 Industrial Canal is located, and behind the proposed seawall. It is reached by vehicular roads, is about 1,500 feet from a car line and is skirted by the Southern Railway.

This property is drained and cleared and is provided with city water and electric lights. It offers a magnificent inducement for industrial or residential development.

## Small Local Conception of Its Value

The Gulf Coast is now just at the beginning of its development. There is small conception locally of the real value of this property. Why not use your knowledge of the history of Florida values and try to acquire this land? It would be a real bargain at \$2,500 an acre. Sellers will carry a 6% first mortgage of \$375,000. Remember, this land is to be sold without limit or reserve. For terms and other details write to
